Description of Courses offered by the

The science of foundations of jurisprudence:

(3) Chr

This course includes the introduction to the foundation of jurisprudence, the legal evidence which scholars agreed or disagreed on them, the Islamic general rules, and the linguistic fundamental bases of jurists.

Introduction to Law:

(3) Chr

This course deals with the general theory of law in terms of definition, its origins, characteristics, bases, branches, sources, interpretation and sphere of application. It also deals with the general theory of right concerning its definition, types, persons, objects, sources, uses, and the means of its protection.

Sources of Commercial Law:

(3) Chr

Prerequisite:

This course deals with the contract in terms of its definition, conditions of conclusion, validity, interpretation, effects and dissolution. It also deals with unilateral act, unlawful act, beneficial act, and finally the law as a direct source of obligation.

Principles of Commercial Law:

(3) Chr

Prerequisite:

This course is concerned with the general principles of commercial law; it covers its origin, development, commercial acts, and the merchant in terms of the required conditions and commercial capacity, the store, its elements and protection, commercial books, commercial registry, and commercial contracts.

Political Systems and Constitutional Law

(3) Chr

This course deals with the definition of constitution and its relation to other laws, types of constitutions, and ways of creating constitutions. It also deals with the regime and the main political system of states, the authorities of the state and the competence of each.

Criminal Law (General Part)

(3) Chr

Prerequisite:

This course offers an in-depth study of crime in terms of its definition, the laws dealing with punishment, its types, and content. It also deals with the classification of crimes and their various categories according to the level of penalty.

Public Finance and Tax Law:

(3) Chr

Prerequisite: Administrative Law:

This course tackles the definition of public finance and its relation with other sciences. It also addresses the most important tendencies in this field, income, outcome, and the public balance. It deals with direct and indirect taxes, income tax systems, and the Jordanian income tax system in relation to tax disputes, systems of tax assessment, judicial and administrative appeal, and tax payment duty.

Public International Law:

(3) Chr

This course deals with the definition of public international law, the base of its obligations, its sources and its relation with other branches of law. It deals with the state as a member of international law. This course also deals with international territories on land, sea and airspace. It also deals with diplomacy, international disputes and means of their settlement.

Administrative Law:

(3) Chr

Prerequisite:

This course deals with the general theory of administrative law in terms of concept, evolution, characteristics, and sphere of application, resources, and its relation with other branches of law. It also addresses the administrative systems, whether centralized or decentralized and also deals with the administrative system in Jordan. In addition, administrative employment and disciplinary procedures are also highlighted.

This course also deals with the means with which administrative authorities apply its administrative functions. Administrative contracts, administrative awards, public property, and public employment are also examined.

Required Course (66) credit Hours

Research Project

(3) Chr

This course examines preparing a research project, which includes the following elements: research title, research problem and its importance and aims, previous studies, research methodology, and bibliography. In addition, this course requires preparing a research paper in a certain legal topic which was taught under the LLB syllabus of the faculty of law.

**Rules of Obligation:****(3) Chr****Prerequisite: Sources of Obligation:**

This course deals with the effects of obligation, namely, execution either voluntary or obligatory, the characteristics of obligation (e.g. the condition "Proviso" and the maturity period, plurality of the subject-matter, and plurality of parties and their joint liability), and conveying the obligation, transferring rights and debts and finally termination of obligation (e.g. the discharge, the impossibility of performance, and limitation of court actions).

Corporation & Bankruptcy:**(3) Chr****Prerequisite: Commercial Law/Principles:**

This course deals with the general theory of companies, their types whether they are shareholding, ordinary or mixed. This course also deals with the legal system of bankruptcy, the pre-conditions in order to issue a decision of bankruptcy and the legal effects on such a decision. In addition, the course highlights the legal rules governing factual conciliation.
