Sustainable Investment Policy

Policy: Investing in infrastructure and green spaces in a way that enhances social and environmental dimensions and achieves sustainable financial returns.

Objective of the Policy:

- Promoting innovation and development in the field of sustainable investment and directing funds towards environmental and social solutions and research.
- Building strategic partnerships with investors and financial institutions to promote sustainable investment in the university.
- Developing investment resources at the university.
- Attracting investment destination that encourages continuity and expansion.
- Developing investment strategies, priorities and strive to improve the university's investment climate.

Approach to achieve this policy :

- Include green energy investments, such as wind or solar energy, in sustainable investment.
- Effective financial and investment planning.
- Optimal use of available financial and material resources and other funding sources.
